

EasyOSCommerce Installation Wizard

Installation process

- Click "install osCommerce".

- Select a directory to install your store in.

- You will not be allowed to install your store in a directory that already contains data.
- You can create a new directory or subdirectory to use by selecting a directory from the list, typing a name in the text area provided, and clicking "create directory".
- Click "next" once you have selected a directory.

osCommerce **Install osCommerce**

Next

- Select a template for your storefront. When you click on a thumbnail on the left, a larger preview image is displayed to the right.
- Click "next" when you have selected a template.

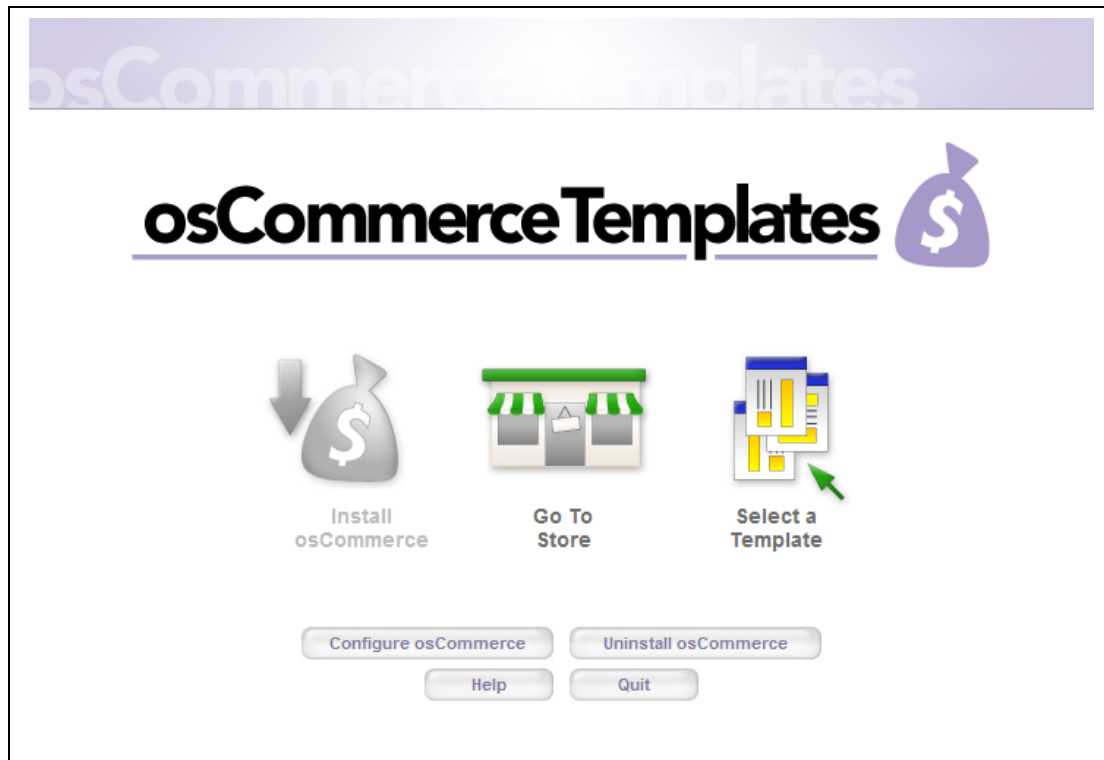

- Your store has successfully been installed.
- You should note the information provided in the summary screen shown above.
- Click "next" to go to osCommerce's administration interface to configure your store.

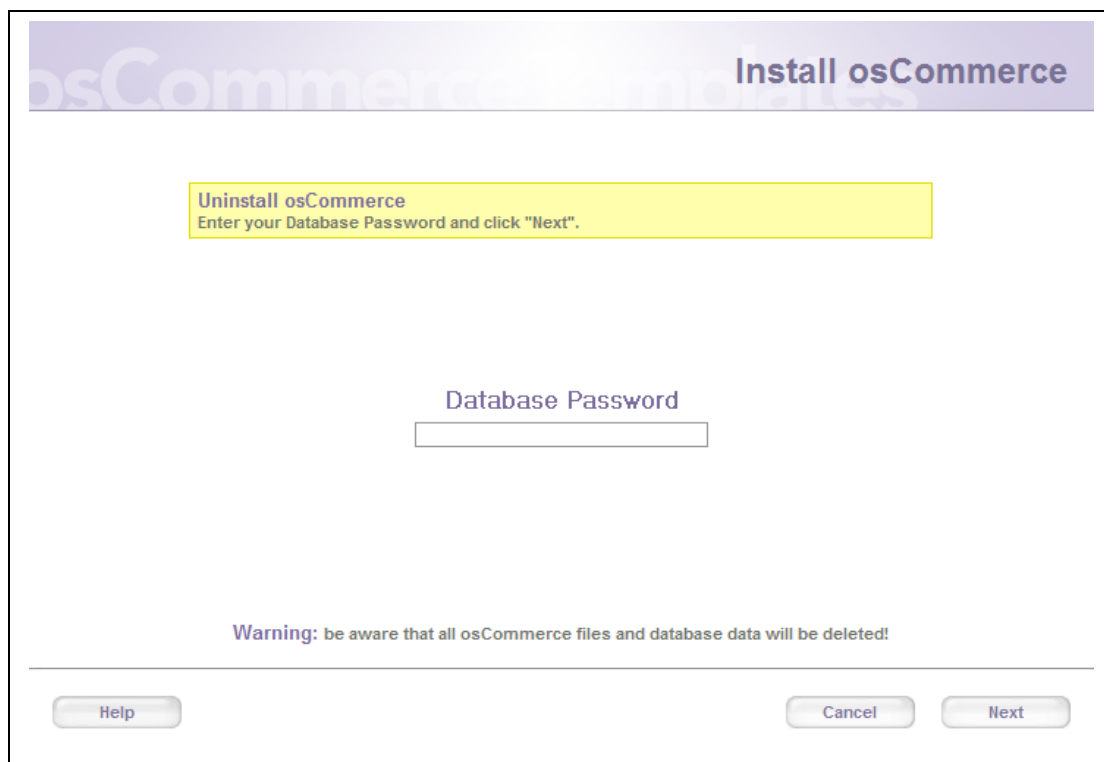

Store Administration/Configuration

- Once you have installed osCommerce, you can access the store's administration page by clicking "next" at the last step of the installation process, or by clicking the "Configure osCommerce" button on the main screen.
- For detailed information on configuring your store, please read the documentation provided by osCommerce: (link).
 - NOTE: as the osCommerce application in WebsiteOS handles the installation and de-installation processes, you may safely skip these sections in the manual.

Uninstall process

- Click "uninstall osCommerce".
- Note: All store data will be lost when you uninstall your store.

- Enter your database password.
- Click "next".
- Your store is now uninstalled.
